## Project Manager

UEE is an industry leading solutions provider in the design and manufacturing of electrical power, distribution and control equipment for mining, oil & gas, industrial and commercial, transportation and resource applications.

We are a highly dynamic team working to double the size of a long-standing success story in the field of custom electrical design and manufacturing for some of world's most exciting projects. Think mobile substations for mines across the world, switchgear for hospitals, landmark buildings, hydroelectric power plants, and linear induction motors for rapid transit systems.

We are currently seeking a Project Manager with electrical experience to join our growing team.

### Accountabilities:

- Manage multiple projects of varying complexity & duration for various customers through their full lifecycle
- Coordinating with suppliers, clients as well as in-house engineering and manufacturing team to meet project deliverables
- Ensure the integrity and scope of the project is upheld through the project lifecycle
- Manage required project adjustments according to the Company's change management system
- Managing both the technical and commercial aspects of projects
- Create an engaging and satisfying experience for our clients

Following the best practices recommended by the PMI, the successful candidate will have at least 3 years of project management experience in a fast paced and collaborative setting. Ideally possessing experience in a manufacturing or operating plant environments, our Project Managers understand and interpret detailed technical specifications and commercial terms in order to effectively manage and meet the needs of our customers.

Excellent communication and interpersonal skills are a must in this dynamic role. The ability to effectively budget, forecast and report on projects through ERP software is crucial, but logic and self-reliance will be key. Electrical trade certification, or technologist diploma an asset.

If this position is for you, you will love working with a group of dedicated project management professionals, a small team of talented designers, and an innovative and efficient production team.

Accountability, team work and performance are fundamentals of how we work as an organization. Respect, integrity and commitment are entrenched in our corporate core values. You will fit well into our team if you believe in these as well.

Interested candidates can apply by emailing your resume and cover letter citing salary expectations to [afitzhugh@uee.com](mailto:afitzhugh@uee.com).
