Field Service Technician- Port Coquitlam

Wismer & Rawlings Electric Ltd. (WRE) provides outstanding technical field service and support for customers across Western Canada and the Northern Territories, leveraging over 60 years of expertise and experience. We are committed to the training and development of our employees, enabling us to uphold our reputation as industry leaders in technical field service.

We are a growing company seeking to expand our team with an action oriented, quality and customer centric individual to take on the role of Field Service Technician with weighted experience in vacuum oil processing.

Working on high, medium, and low voltage power apparatus on customer sites, this position is responsible for completing detailed testing and system analysis to determine the condition of high voltage equipment such as switchgear, transformers and generators, within a very autonomous work environment. Our team of Field Service Technicians are directly involved in programming, technical reports, providing technical support, and the mentorship and development of junior employees. Additionally, they participate in the development and adherence to safe work practices. The Field Service Technician ensures a high level of service that is a key differentiator from our competitors.

The successful applicant will have vacuum processing oil rig operator experience, with strong knowledge of various Transformer oil processing duties including: operating oil and vacuum pumps, taking oil samples as required, maintaining oil processing equipment in mechanical working order. Load Tap Changer (LTC) maintenance and repair knowledge, assembly and repair of high voltage transformers, in addition to having transformer testing experience are an asset.

The successful candidates will have:

- Completion of electrical trade certificate, electrical technologist degree or equivalent experience.
- 5+ years of experience working in the electric power sector.
- Valid Class 5 BC Driver's License with a clean drivers abstract required, Class 1 license an asset.
- Field operations experience in Electrical Commissioning and Maintenance an asset.
- A sound understanding of Canadian electrical standards, HV substations, MV and LV distribution systems, and large electrical systems required, including power, protection and control systems.
- Knowledge of electrical engineering principals an asset.
- Strong problem identification and problem resolution skills.
- Demonstrated ability to exercise necessary cost control measures.
- Effective leadership skills required.
- Client service focus.
- Demonstrate a capability to be effective in a complex and fast paced environment.
- Able to effectively communicate both verbally and in writing with all levels of the organization, including executives.
- Excellent organizational skills and attention to detail.
- Excellent computer & technical skills.

The Field Service Technician significantly influences customers' experience with the organization and our services. We have a team of highly skilled professionals who insure the prompt response to customer needs through superior technical knowledge, and a thorough health and safety processes.

Interested candidates can apply by emailing your resume and cover letter citing salary expectations.
